EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Cameron on 6/19/07.

The application has been amended as follows:

22. (Currently Amended) An amplifier circuit, comprising: at least one transconductor device connected to at least one phase shifter section with an adjustable phase shift and an impedance at least partially dependent on the frequency of an input signal, wherein in use said adjustable phase shift is adjusted to have substantially the opposite value of a phase shift of said transconductor device; and at least one gyrator circuit having at least one transistor therein and having an input contact connected to an output contact of the transconductor device of said amplifier circuit, wherein said at least one transistor has a gain substantially the inverse of the gain of the a transistor in said amplifier circuit.

The following is an examiner's statement of reasons for allowance: With regards to claims 14-21, the prior art of record does not disclose or fairly teach said adjustable phase shift being adjusted to have substantially the opposite value of a phase shift of said transconductor device. With regards to claim 22-25, the prior art of record does

not disclose or fairly teach at least one gyrator circuit having at least one transistor therein and having an input contact connected to an output contact of the transconductor device of said amplifier circuit, wherein said at least one transistor has a gain substantially the inverse of the gain of a transistor in said amplifier circuit. With regards to claim 26, the prior art does not disclose or fairly teach generating a current signal based on a voltage of an input signal; and adjusting a phase shift of a resistor device to substantially the opposite of a phase shift of said current signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly E. Glenn whose telephone number is (571)-272-1761. The examiner can normally be reached on Monday-Friday 7:30 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571)-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
